

**Press Release****Tata Communications and Streamonix Sign Memorandum of Understanding for Real-time Streaming Pilot Project**

*New Jersey, UNITED STATES and Vancouver, CANADA, August 31, 2022*

[Tata Communications \(America\) Inc.](#), a global digital ecosystem enabler, and [Streamonix, Inc.](#), a real-time streaming systems developer, have signed a Memorandum of Understanding (MoU) for the development, deployment and testing of a next-generation, real-time streaming pilot project.

This pilot project will be based on Streamonix's Media Streaming Federation™ (MSF) technology and will feature MSF streaming systems deployed in Tata Communications' US network to transmit live HD, 4K and 8K video to test users.

The pilot project will demonstrate the ultra low-latency, ultra high bit-rate streaming capability of Streamonix technology and its suitability as the foundation for global-scale, real-time streaming applications such as live sports and entertainment, distance education, remote surgery and emergency alerting. A crucial goal of the project is to explore the use of Streamonix's technology combined with Tata Communications' networks for delivering the evolving mix of real-time media payloads that will form the essential elements of the Metaverse. A further goal is to demonstrate Streamonix's Glass-to-Glass™ technology that creates virtual links between camera lenses and user screens for enhanced video display and enriched user experience.

“The demand for low-latency, high bit-rate streaming is rising rapidly across several of our markets, and is driving the need for high performance, cost-effective live streaming solutions”, said Jeremy Dujardin, CTO, Global Media & Entertainment Services at Tata Communications. “This pilot project with Streamonix gives us an opportunity to evaluate the potentially game-changing Streamonix solution and to work together to redefine the live streaming infrastructure market.”

“Tata Communications' network infrastructure and global reach are second to none, and provide the ideal networking platform for deploying and testing our Media Streaming Federation”, said Bradley Hankinson, CEO of Streamonix. “Working with Tata Communications enables us to demonstrate the vital benefits of our scalable, secure, ultra low-latency Glass-to-Glass streaming technology.”

**About Tata Communications**

A part of the Tata Group, Tata Communications (NSE: TATACOMM; BSE: 500483) is a global digital ecosystem enabler powering today's fast-growing digital economy in more than 190 countries and territories. Leading with trust, it enables digital transformation of enterprises globally with collaboration and connected solutions, core and next gen connectivity, cloud hosting and security solutions and media services. 300 of the Fortune 500 companies are its customers and the company connects businesses to 80% of the world's cloud giants.
